

# St. Joseph's Healthcare

Hamilton

*It is an honour to serve our community.*

In 2007 St Joseph's Healthcare employed Document Conversion Management to sort out and scan all of our drawings. In order to do this work all drawings were removed from the site sorted and cataloged all of our drawings. While they had these drawings we were able to have any we needed sent to us within a 24 hour period so they were really always available for us if required. We can now find any print that we require and make copies as we need them. DCM also provided training for all personnel and helps us maintain our document on an ongoing basis.

In closing DCM did an outstanding job of helping us straighten out a ~~system that really did not exist and I would recommend their service to~~ everyone.

John Duncan
